“ I have so many memories of my dad there are too many to mention. A couple that stick out in my mind are when I was a small child had done something wrong he used as an example my veins in my chest showing how one could go one way and one could go another. Another funny memory was when he disapproved of me using candles and used an example of a moss could fly by catch on fire and the land in a box of Kleenex and could start the whole house on fire 😊. I couldn't have asked or been blessed buy a better dad. I love you ❤️💙
