“ Dennis, even though I didnt call him by the name, he was my dad through the most important years of a young boys life. If u know Dennis then you know that he is highly versed in all aspects music. Whether it was music theory or playing music. And for the lack of better words, that man could f\*@%ing play. Every time he picked up an acoustic guitar.....see ya!! Dennis had that natural calling and a deep relationship with music. Whether he realized it or not, he inspired me to play. And playing music, for me, has evolved and hijacked my soul....all thanks to Dennis. Because of this man I have this universal and everlasting gift that I proudly pass on to my kids. I listened to him play for decades. I learned from him for decades. I hear him when I play. He is eternal. We miss you Dennis. I love you! Godspeed.
