“ You taught me all your passion about caring for young children. You came to my home right after we moved to Ponca City, begging me to come to work at the CDC. Little did I know then, what my life would end up experiencing!! We had some of the best-funniest-heroic-hard struggles together in caring for the children in our care. YOU were a mess!!! Always something new you wanted to try. I called you the "Queen of forms"! Memories are a great thing to have for ever as I sat today remembering the things we went thru -the classes we attended- the food we made- the building we reformed over and over- All for kids!! You were my mentor, and I love you for that. Its been a few years since I've seen you as you would come into the center to pick up a grand and we'd have a few walks down memory lane. I know the heavens are a little brighter with your grand entrance! May you know of the impact you made changed the lives of many littles in our community.

Love you my friend
